

Multidisciplinary Centre for Advanced Research and Studies (MCARS)

JAMIA MILLIA ISLAMIA

Jamia Nagar, New Delhi – 110 025

Cordially invites you to attend Lecture on

“Role of molecular models in unravelling new biology”

Dr.Chandra verma

Senior Principal Investigator

Atomistic Simulations and Design in Biology

Bioinformatics institute, A*Star, Singapore

Prof. Chandra verma is head of division of atomistic simulations and design in biology, A*Star, Bioinformatics institute, Singapore. His group investigates biomolecular mechanisms, designs molecules and peptides as reagents and as therapy, working with academics, clinicians, industry. The group has several patents which have resulted in a spinoff Sinopsee Therapeutics. He carried out his undergrad studies at IIT Kanpur, followed by a PhD at the University of York. He then continued at York as a research fellow in the structural biology lab prior to joining Singapore.

30th August, 2019 Friday @ 10:30 am Venue: Conference Hall MCARS, JMI
