Cordially invites you to attend talk and interactive session on

“Towards a Genomics led economy and career opportunities”

by,

Mr. Praveen Gupta

Premas Life Sciences

Genomics has grown leaps in bounces in the last 10 years thanks to the development of cutting edge tools like Next Generations sequencing platforms and associated tools. With players like Illumina pushing the envelope wrt both output and quality of Genomics data, we are witnessing a huge spurt in its adoption. Applications of NGS are far and wide ranging from research to clinical and its adoption is growing at a CAGR of almost 20% year on year. Currently there are 15000 NGS users in the world and the Genomic pundits predicts that they will have 100,000 users globally in next 3 years time frame. This massive growth will create a slew of opportunities for professionals who are qualified and trained to handle these technologies in all sectors that are adopting them. This talk will give a glimpse of such opportunities that currently exist or will come up in near future both in India as well as globally.
